

Getting started with eero

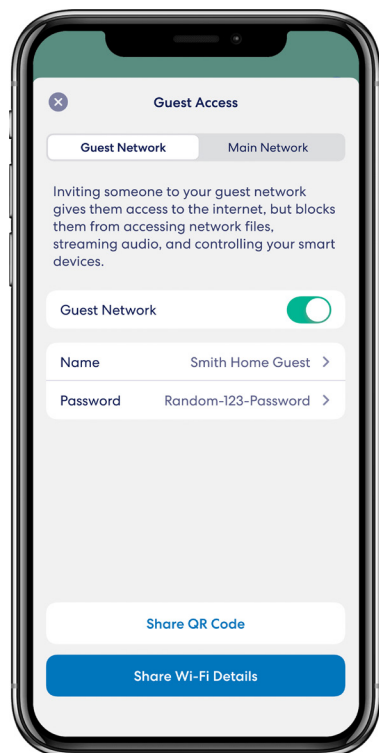

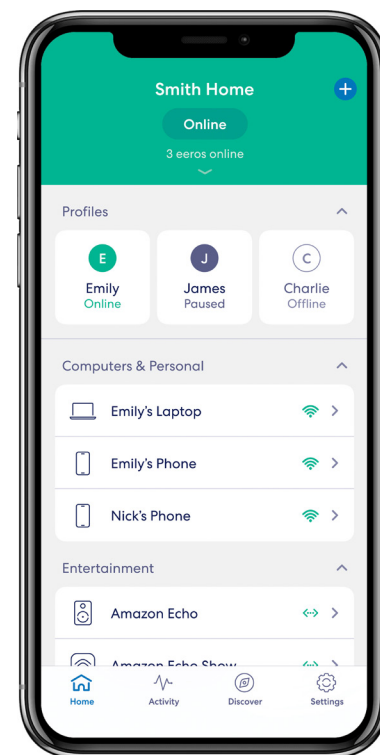

Once setup is complete, start making the most of your eero system by setting up many key features.

Take control of your network

Add all your devices, create profiles, run a speed test, and stay on top of what is happening.

With the eero app, you can easily manage and monitor all your connected devices.

- Tap the blue **+** button to add a device, set up a profile to manage a group of devices, and invite a guest to share your network.
- Tap **Activity** to run a speed test on your network access additional security options.
- Tap **Settings** to change your network name and password and access additional features of your eero network.

Enable Guest Access

Guest access allows you to quickly share your network with friends, family and other guests.

Every eero network has a main and guest network. Both networks can be shared with others. Enabling Guest Network gives you a separate network that is isolated from your main one.

1. Open the eero app and tap the blue **+** button
2. Tap **Invite a Guest**
3. Toggle on the Guest Network
4. Provide a Name and Password
5. Share the network details with a QR code or send an invitation for others to join the network

Group Devices using Profiles

Create profiles and use schedules to manage screen time for your household.

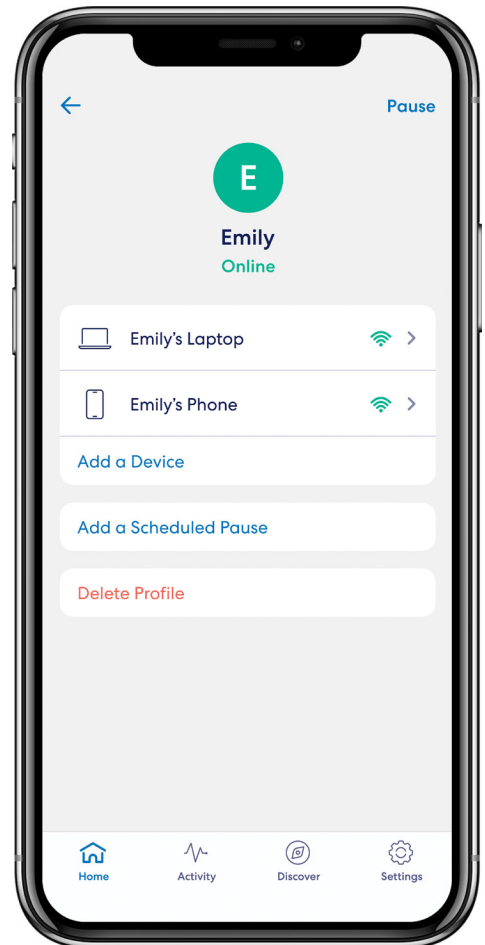

Simply manage internet time for each individual in your home with Family Profiles.

1. Open the eero app and tap the add button
2. Tap **Add a Profile**
3. Follow the in-app steps
4. Once all the devices have been selected, tap **Save**

After a profile has been created, you can use schedules to manage screen time. To create a schedule:

1. Tap on a profile
2. Tap **Add a Scheduled Pause**
3. Tap the button to enable the schedule
4. Give the schedule a name, start time, end time, and select the days of the week to enforce
5. Tap **Save**

To delete a schedule, tap back into the schedule and tap **Delete Schedule** and confirm.

Set up Notifications for your Network

Receive push notifications when a new device has joined your network and when your network software has been upgraded.

1. Open the eero app and tap the **Settings** tab
2. Tap **Notifications**
3. Toggle on/off notifications for new devices on the network and software updates
